

# FuchsRohr® - das Aluminium-Bohrrohr

## Advantages

- high strength
- low weight
- less torque, smaller drill rigs necessary
- increased drilling range
- higher drilling speed
- high corrosion resistance
- non-magnetic
- materials tested in aerospace industry

## Fields of application

- Slope stabilisation with lightweight carriage appliance
- Deep drillings
- Sonic drilling method
- Explosive ordnance detection (no influence on measuring systems)
- Jet grouting drilling method with measurement possibility
