

AluDrill™ - the aluminum drill pipe

Advantages

- high strength
- low weight
- less torque, smaller drill rigs necessary
- increased drilling range
- higher drilling speed
- high corrosion resistance
- non-magnetic
- materials tested in aerospace industry

Fields of application

- slope stabilisation with lightweight carriage appliance
- deep drillings
- sonic drilling method
- explosive ordnance detection (no influence on measuring systems)
- jet grouting drilling method with measurement possibility
